JS DIGITECH SHANGHAI CO LTD

Product name: Glasses free 3D display interactive 65"

Model no: SY3DAP65-IV

**Brief introduction:** 

This is the world innovative new concept advertisement display with

glasses free 3D display, interactive gaming, AR, auto-switching from ad

commercial display and gaming. It is equipped with world leading high quality

glasses free 3D display 65", 3D image quality just stunning and amazing, POP

out image about 80 – 100cm out of screen, super strong visual impact to any

viewers, uniquely designed auto-switching software for ad commercial display

and game. Any 3D ad commercial side by side can be automatically played in

the play list, and any interactive game based on Unity can be run in the game

list. Gesture control is by Microsoft Kinnect.

The game player is connected to a vending machine with cooling freezer. If

the gamer reaches a certain high score or level, the vending machine will

release an item from its stock track as an award. This is a big attraction to the

gamers in the public area where it is deployed.

This is triple concepts of advertisement: 3D ad commercial display with

super strong POP out and big visual impact to the viewers, game implanted

with advertisement, award item itself as promotional items. This is extremely

good for the new product promotions.

Main features:

 $\Diamond$ Gesture control detecting from the whole body movements

 $\Diamond$ 3D image stunning and realistic, high brightness, high clarity

 $\Diamond$ Super strong visual impact, deep impression to the viewers and players

- 2 -

- ♦ Ad commercial display 2D/3D both applicable
- ♦ Game play 2D/3D both applicable
- ♦ 3D ad play and game play automatically switch if detected in game area
- ♦ 3D ad commercial and game modularized, easily implant ad elements
- ♦ Game result with award, more attractive, more advertisement effects
